DETAILED ACTION

1. Claims 4-8, 14-19, and 23-27 remain for examination. The correspondence filed 12/19/08 amended claims 4-8, 14-19, and 23-27.

Response to Arguments

2. Applicant's arguments, see the amendment filed 12/19/08 with respect to the rejections of the claims under 35 USC 101 and 112 (1st paragraph) have been fully considered and, except where noted below, are persuasive. The rejections of claims 5-8, 14-19, and 23-27 have been withdrawn. However, the same arguments when applied to claim 4 are not persuasive because, although Examiner now accepts that the specification supports a circuit-based apparatus, the language of claim 4 does not tie to the method to said circuit or to any particular machine; nor does the transformation of one type of data to another constitute a physical transformation as required for statutory compliance as established by *In re Bilski*.

Claim Rejections - 35 USC § 101

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claim 4 is rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) be tied to particular machine, or (2) transform underlying subject matter (such as an article or material) to a

Art Unit: 2435

different state or thing. See page 10 of *In Re Bilski* 88 USPQ2d 1385. The instant claims are neither positively tied to a particular machine that accomplishes the claimed method steps nor transform underlying subject matter, and therefore do not qualify as a statutory process. The claimed method is broad enough that the claim could be completely performed mentally, verbally or without a machine nor is any transformation apparent. For example, the claim could be performed by a human receiving a piece of content such as a still image or text file from an external device such as a monitor or printer, and then subsequently performing the remaining calculation steps to produce the numeric value that is the end result of the claim.

Allowable Subject Matter

5. Claims 5-8, 14-19, and 23-27 are allowed, as the prior art of record does not teach nor reasonably suggest a circuit-based apparatus performing the various limitations of those claims (cf. the previous Office Actions).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2435

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
